

CONCEPT: HBC JOB MAJUU

1. Executive Summary & Strategic Alignment

Healthcare Business Consortium (HBC) has established a strategic position in the market as an accredited Continuing Professional Development (CPD) provider and facilitator connecting healthcare institutions with client pipelines. Building upon operational momentum since early 2026, HBC is positioned to launch **HBC Job Majuu**—a licensed, tech-enabled international recruitment and mobility ecosystem.

Registered under the **National Employment Authority Integrated Management System (NEAIMS)** in Kenya, HBC Job Majuu directly addresses the high demand for ethical, verified, and structured overseas employment pathways to Europe, the United States, and broader international markets.

HBC JOB MAJUU PLATFORM		
Candidate Portal	Admin Operations	External Systems
- Job Discovery - ATS Tracking - Visa Engine	- ATS & Vetting - Agent Matrix - Verification	- NEAIMS Sync - Payment Hub - Embassy APIs

Strategic Objectives

- Market Trust & Legitimacy:** Eliminate recruitment fraud through verified international agent networks, transparent candidate vetting, and strict NEAIMS compliance
- Monetization Multiplier:** Implement a 3-tier financial gatekeeping model that filters non-serious applicants while securing sustainable operational revenue.
- Vertical Integration:** Leverage HBC’s core CPD capabilities to upskill and certify candidates prior to foreign deployment, creating an end-to-end talent pipeline.

2. Business & Revenue Model

HBC Job Majuu employs a **3-Tier Monetization Framework**. This structure filters passive candidates, covers immediate verification overheads, and captures high-margin success fees upon successful candidate placement.

Tier	Fee Type	Trigger Event	Scope & Value Delivered	Flexibility & Control
Tier 1	Platform Access / Membership	Post-registration	Unlocks detailed job descriptions, employer identities, priority match alerts, and application eligibility.	Fixed standard fee across all user profiles.
Tier 2	Application & Verification	Job submission	Covers credential authentication, background checks, document validation, and internal ATS processing.	Variable based on job level, country requirements, or medical board clearances.
Tier 3	Placement & Processing	Contract signature / Visa issuance	Covers visa processing, travel logistics, work permit finalization, and employer onboarding coordination.	Dynamic; calculated as a fixed package fee or percentage of contract terms.

Financial Gatekeeping Logic

- **Public Tier (Free):** High-level job listings (Title, Sector, Destination Country, General Requirements). Salary and employer identification remain masked
- **Member Tier (Tier 1 Paid):** Full job specifications revealed, candidate profile indexed for recruiter matching, access to visa guidance tools.
- **Applicant Tier (Tier 2 Paid):** Document verification initiated, direct submission to overseas partner agency/employer.
- **Placement Tier (Tier 3 Executed):** End-to-end relocation and visa processing activated post-offer acceptance.

3. Product Scope & Functional Modules

HBC JOB MAJU CORE MODULES			
Jobs Engine	Visa Portal	Media ("Our Stories")	Knowledge Hub
• Advanced Search • Masked / Full Details Engine • Tiered Access	• Work Visas • Study Visas • Travel & Family • Medical Relocation	• Candidate Testimonials • Video Career Advice • Cultural Orientation • Agent Interview Spot	• Immigration Policy Updates • Salary Benchmarks • Document Checklist Guides • Interview Preparation

Module 1: International Jobs & Candidate Portal

- **Automated Applicant Tracking System (ATS):** Real-time candidate pipeline stages (Applied → Document Verification → Agent Screening → Employer Interview → Offer Extended → Visa Processing → Deployed).
- **Masked Salary Engine:** Flexible salary display capabilities (Disclosed upfront, Masked until Tier 1 unlocked, or Revealed at interview invitation stage).

Module 2: Integrated Visa Application Services

- Coverage across multi-category visas: **Work Permits, Study Visas, Tourist/Business Travel, and Medical Relocation.**
- Milestone-driven task checklists allowing candidates to upload specific travel documents, track embassy appointment slots, and view verification statuses.

Module 3: Media & Engagement ("Our Stories")

- Embedded video architecture for success stories, overseas living guides, interview tips, and partner agency spotlight features
- Social media syndication to drive traffic from platforms (LinkedIn, YouTube, Instagram, TikTok) into the web/app funnel.

Module 4: Blog & Regulatory Insights

- Editorial platform focused on foreign employment laws, credentialing requirements (e.g., NCLEX, IELTS, USMLE, trade certifications), and diaspora updates.

4. Compliance, Security & Governance

- **NEAIMS Portal Synchronization:** Automated logging of candidates placed abroad to satisfy Kenyan regulatory mandates.
- **Data Privacy Protocols:** Strict compliance with the **Kenyan Data Protection Act (KDPA)** and GDPR (due to operations in European jurisdictions), including encrypted document vaults for passports, transcripts, and medical certificates
- **Agent Verification Framework:** Internal auditing tools to tag, score, and monitor accredited partner agencies in Western markets, mitigating liability and fraudulent job offers.

System Architecture & Technical Specifications

1. System Architecture & Technology Stack

The platform requires a high-availability, multi-tenant cloud architecture supporting a web application, native/cross-platform mobile apps (iOS & Android), and a dedicated administrative operational backend.

- **Frontend Framework:** React.js / Next.js (Web) and Flutter / React Native (Cross-Platform Mobile).
- **Backend Services:** Node.js (TypeScript) or Go microservices for secure processing and real-time state tracking.

- **Primary Database:** PostgreSQL or MySQL with strict relational constraints and indexing for candidate search optimization.
- **Object Vault:** AWS S3 or Cloudflare R2 with side-side AES-256 encryption for high-security document storage (Passports, Academic Transcripts, Good Conduct Certificates).

2. Payment Gateway Architecture & Webhook Logic

The payment system coordinates multi-currency and local payment solutions (e.g., M-Pesa, Card Gateways, Bank Transfers) through a unified payment orchestration layer.

Step-by-Step Payment Flow Sequence

1. **Initiation:** The client selects an action (e.g., *Apply for Job ID 884*).
2. **State Check:** System checks user status. If Tier_1_Paid == False, prompt the Tier 1 payment modal. If Tier_1_Paid == True, compute Tier 2 dynamic fee.
3. **Execution:** Payment Gateway returns a payload with a unique transaction reference (TX_ID).
4. **Asynchronous Webhook Processing:**
 - o Server validates signature to prevent fraud.
 - o Ledger entry updated in database (payments table).
 - o Candidate access tokens re-issued with updated scopes.
 - o Automated SMS/Email receipt dispatched with itemized tax and statutory breakdown.

3. Database Entity Relationship Model (Core Tables)

-- User Account Table

```

CREATE TABLE users (
  user_id UUID PRIMARY KEY DEFAULT gen_random_uuid(),
  first_name VARCHAR(50) NOT NULL,
  last_name VARCHAR(50) NOT NULL,
  email VARCHAR(100) UNIQUE NOT NULL,
  phone_number VARCHAR(20) UNIQUE NOT NULL,
  password_hash VARCHAR(255) NOT NULL,
  membership_tier VARCHAR(20) DEFAULT 'FREE', -- FREE, MEMBER, PLACED
  neaims_status VARCHAR(50) DEFAULT 'PENDING_REGISTRATION',
  created_at TIMESTAMP DEFAULT CURRENT_TIMESTAMP
);

```

-- Jobs Posting Table

```

CREATE TABLE jobs (
  job_id UUID PRIMARY KEY DEFAULT gen_random_uuid(),

```

```
title VARCHAR(150) NOT NULL,  
country VARCHAR(50) NOT NULL,  
sector VARCHAR(50) NOT NULL,  
description_masked TEXT NOT NULL,  
description_full TEXT NOT NULL,  
salary_disclosed BOOLEAN DEFAULT FALSE,  
salary_range VARCHAR(50),  
tier_2_fee DECIMAL(10, 2) NOT NULL DEFAULT 0.00,  
tier_3_fee DECIMAL(10, 2) NOT NULL DEFAULT 0.00,  
status VARCHAR(20) DEFAULT 'ACTIVE', -- DRAFT, ACTIVE, FILLED  
created_at TIMESTAMP DEFAULT CURRENT_TIMESTAMP  
);
```

-- Applications & ATS Tracking Table

```
CREATE TABLE applications (  
  application_id UUID PRIMARY KEY DEFAULT gen_random_uuid(),  
  candidate_id UUID REFERENCES users(user_id),  
  job_id UUID REFERENCES jobs(job_id),  
  ats_stage VARCHAR(50) DEFAULT 'SUBMITTED', -- SUBMITTED, VETTING, AGENT_REVIEW,  
INTERVIEW, OFFER, VISA, DEPLOYED  
  tier_2_paid BOOLEAN DEFAULT FALSE,  
  tier_3_paid BOOLEAN DEFAULT FALSE,  
  assigned_agent_id UUID,  
  updated_at TIMESTAMP DEFAULT CURRENT_TIMESTAMP  
);
```

-- Transactions Ledger Table

```
CREATE TABLE transactions (  
  transaction_id UUID PRIMARY KEY DEFAULT gen_random_uuid(),  
  user_id UUID REFERENCES users(user_id),  
  application_id UUID REFERENCES applications(application_id),  
  payment_tier VARCHAR(10) NOT NULL, -- TIER_1, TIER_2, TIER_3  
  amount DECIMAL(10, 2) NOT NULL,  
  currency VARCHAR(5) DEFAULT 'KES',  
  provider_reference VARCHAR(100) NOT NULL,  
  payment_status VARCHAR(20) DEFAULT 'PENDING', -- PENDING, SUCCESS, FAILED  
  created_at TIMESTAMP DEFAULT CURRENT_TIMESTAMP  
);
```

4. Operational Back-Office & Admin Dashboard Requirements

The Admin Panel requires a multi-role RBAC (Role-Based Access Control) matrix to manage sensitive candidate pipelines:

SUPER ADMIN / EXECUTIVES	
- Global Revenue & Operational Dashboards - System Configuration & Audit Logs	
VERIFICATION OFFICERS	AGENT / PARTNER NETWORK
- Document Audit Portal - Compliance Checks (NEAIMS)	- Candidate Review Vault - Interview Scheduling Tool

- Document Audit Workspace:** Split-screen verification viewer allowing staff to compare candidate-uploaded identity/qualification documents against verification databases.
- Agent Partner Portal:** External partner access restricted exclusively to candidates in AGENT_REVIEW stage, suppressing candidate direct contact info until contracts are signed.
- Automated Audit Logs:** Immutable tracking of all administrative status changes (e.g., tracking which officer approved a visa document or marked a Tier 2 payment as verified).

Strategic Recommendations & Market Benchmarking

1. Competitive Analysis & Enhancements over Reference Platforms

Reviewing regional market benchmarks (such as *Simizi Job* and other domestic overseas recruitment agencies) highlights common friction points and critical vectors for improvement:

MARKET GAP (Competitor Limitations)		HBC JOB MAJUU SOLUTION ARCHITECTURE
Opaque status updates via SMS	➤➤➤	Visual real-time ATS Kanban tracking
Unclear fee breakdowns	➤➤➤	Transparent 3-tier milestone model
Static text listings	➤➤➤	Integrated video stories & media hub
Manual document uploads via email	➤➤➤	Encrypted candidate document vault

Product Differentiators to Implement

- Interactive Visual Candidate Roadmap:** Instead of static status text, provide candidates with a step-by-step progress tracker on web and mobile showing their exact placement phase.
- Video & Story Engagement Engine:** Integrate media directly onto job listings (e.g., a 60-second video tour of the hospital or facility in Germany or the US where the applicant will work).
- Self-Service Visa Readiness Assessor:** Build an automated eligibility questionnaire (covering passport validity, language certifications like IELTS/Goethe, and clinical licenses) before allowing Tier 2 application fee payments.

2. Synergies with Core HBC Healthcare & CPD Business

HBC's background in accredited CPD training provides a distinct competitive advantage over generalist employment agencies:

- **Pre-Deployment Bridge Training:** Candidates missing specific overseas requirements (e.g., specialized medical handling or international nursing certifications) can be routed directly to HBC's existing CPD modules to bridge the gap.
- **Institutional Credibility:** Operating as both an accredited professional development provider and a licensed recruitment agency reinforces trust with overseas hospitals, care homes, and corporations seeking verified talent.

4. Phased Execution & Strategic Roadmap

PHASE 1: Foundations (Months 1–2)	PHASE 2: Beta Launch (Months 3–4)	PHASE 3: Scale (Months 5+)
• Finalize NEAIMS Sync Specs • Complete Database Architecture • Secure Payment Gateway Hooks	• Deploy Web App & Admin Portal • Pilot Tier 1 & Tier 2 Payments • Onboard First 5 Verified Agents	• Launch iOS/Android Apps • Expand USA/Europe Partner Network Integration

1. **Phase 1: Legal & Architectural Setup (Months 1–2)**
 - Finalize legal integrations and secure NEAIMS API endpoints.
 - Build core database schema, backend microservices, and storage vaults.
 - Onboard and vet initial overseas agency partners in target markets (USA, UK, Germany, Nordic Region).
2. **Phase 2: Platform Beta & Web Launch (Months 3–4)**
 - Launch public-facing Web Application featuring the 4 primary navigation modules (Jobs, Visas, Stories, Blog).
 - Activate payment integrations for Tier 1 and Tier 2 processing.
 - Conduct a pilot recruitment run with a select cohort of healthcare and general candidates.

3. **Phase 3: Mobile Release & Full Operational Scale (Months 5+)**

- Release native iOS and Android applications with push notifications for ATS status updates.
- Expand media production for candidate stories and career advice content.
- Enable automated partner agency portals for direct international employer candidate sourcing.
